Ankit Khare

AI Developer Relations and Developer GTM Leader

ankit1khare@gmail.com | empathicak.netlify.app | github.com/ankit1khare | linkedin.com/in/deeplearnerak

PROFESSIONAL SUMMARY

Developer Relations and developer GTM leader for B2B AI products. Builds DevRel as a full-funnel growth system: developer insight to product narrative, technical demos and content, launches, events, partner distribution, qualified pipeline, and sales enablement. Impact includes major enterprise deals from hackathons, 50x growth in YouTube views, 10x watch-time growth, 1,200 workshop sign-ups, a 110k LinkedIn audience across company brand accounts, and a 600-member multimodal AI Discord community.

DEVREL GTM OPERATING MODEL

- Positioning and narrative: translate technical differentiation into category stories, launch narratives, competitive proof, and sales-ready messaging.
- Developer funnel instrumentation: connect docs, playground, content, community, website, and campaigns with analytics so GTM can see adoption and pipeline signal.
- Distribution systems: build repeatable motions across technical content, creators, partners, hackathons, events, webinars, social, SEO, and executive programs.
- Technical credibility: AI research background, software engineering foundation, Python fluency, and practical experience with modern LLM/application workflows.

EXPERIENCE

Director of Developer Relations and Developer GTM - LandingAI

Agentic AI | business growth, product education, brand positioning | Dec 2024 - Present

- First DevRel hire; built the function across product narrative, developer education, analytics, events, launches, hackathons, and sales enablement.
- Led the first benchmark effort for Agentic Document Extraction, collaborating with ML research and product leadership to create benchmark-backed GTM collateral.
- Instrumented the developer journey across docs, playground, marketing site, and campaigns with analytics and attribution.
- Ran 3 fintech hackathons that produced high product awareness, critical product feedback, qualified leads, and 3 major enterprise deals.
- Led product launches with videos, blog posts, Reddit distribution, influencer marketing, and technical proof assets.

Member of DevRel Staff - OpenAI

AGI | developer experience, product feedback | Apr 2024 - Nov 2024

- Executed early access programs for academic researchers and translated feedback into product signals for internal teams.
- Contributed to developer experience, docs, workshops, and demos including a Mental Framework for LLM Optimization workshop.

Developer Marketing Manager - Rockset acquired by OpenAI

Database for GenAI | brand awareness, product education | Aug 2023 - Apr 2024

- Built a DevRel operating model with writers, video editors, email marketing, graphic design, and developer advocacy support.
- Designed and ran RAG education across Gemini, Claude on Bedrock, and OpenAI models; hosted code-along workshops with executives, influencers, and AI researchers.
- Revamped the YouTube channel and partnered on retargeting and SEO, improving monthly views by 50x, watch time by 10x, and subscribers by 2x.
- Organized GenAI/vector database partner webinars and helped build INDEX Conference 2024 with a startup expo for high-growth AI infrastructure companies.

EXPERIENCE CONTINUED

Lead Developer Experience Advocate - Twelve Labs

Video understanding AI | awareness, activation, developer feedback | Mar 2023 - Jul 2023

- Participated in 40+ Bay Area tech events to increase product awareness and deliver talks and demos on multimodal AI.
- Founded the Multimodal Minds Discord community and grew it to 600 engaged members within three months.
- Authored API tutorials, built demo applications, hosted Multimodal Weekly, and launched Lunch and Learn sessions for PM, TPM, and founder feedback.

Head of Content and Developer Relations - Abacus.AI

Deep learning models | docs, DevEx, community | Apr 2020 - Feb 2023

- Managed a developer advocate, documentation team, and technical content writers while building docs, demos, workshops, videos, and community programs.
- Increased workshop engagement from 20 to 1,200 regular sign-ups and led product demo sessions for strategic prospects with strong conversion.
- Built an 11.5k Twitter following and a 5,500+ monthly newsletter audience; created product videos, shorts, and product education assets.
- Set documentation-quality KPIs and DevRel funnel measures; partnered with end users, solutions architects, PMs, and research teams to identify product gaps and shape roadmap priorities.
- Led Model Showcase work during Series B by training 20 deep learning models on common industry use cases.

Graduate AI Researcher - UT-Arlington LEARN Lab

Image captioning, path planning, computer vision | Sep 2018 - May 2020

- Published Show, Infer and Tell, selected for the BMVC 2019 oral session and recognized with Best Student Paper honorable mention.
- Trained a state-of-the-art image captioning model using NVIDIA P100 GPUs on GCP and Self-Critical Sequence Training.
- Built DNN plus RRT path-planning work and viral computer-vision parking management tutorials and prototypes.

Software Engineer - Nagarro Software

Web development | C#, SQL, Agile | Apr 2014 - Feb 2016

- Built web applications with C#, SQL, and Knockout.js in Agile/Scrum teams; received Star Performer recognition among junior associates.

SELECTED WORK SAMPLES

- Benchmarks and articles: DocVQA Agentic Document Extraction benchmark; AP Automation without replacing the stack; Twelve Labs video search and classifier API tutorials.
- Hackathons and events: LandingAI fintech hackathons, Global Agentic Hack, Rockset INDEX Conference startup expo.
- Workshops and talks: LLM Optimization, DSDOJO OCR, Twelve Labs video AI talk, DevRel vodcasts with Sean Falconer and Demetrios.
- Videos: VisionAgent, Agentic Extract launch, NYC Championship highlights.
- Research: BMVC paper, master's thesis, computer-vision parking systems, DeepSegment.

EDUCATION

The University of Texas at Arlington - M.S. in Computer Science, research track with focus on AI, 2016 - 2019. TPEG recipient for excellent research record.

Lovely Professional University - B.S. in Computer Science, 2010 - 2014. 80% scholarship grant based on state-level engineering examination.

ECOSYSTEM AND ADVISORY

- Regular participant in AI infrastructure, DevRel, and founder ecosystems including Redpoint DevRel get-togethers and Cafe Compute.
- Advised startups including Statsig, CopilotKit, and Reflex on content strategy, DevRel hiring, community building, and distribution setup.
- Personal edge: technical enough for builders, warm enough for community, commercial enough for GTM.
